

H19 Series BASO® High Pressure Safety Pilot Valves

The H19 Series BASO® high pressure safety pilot valves are designed for commercial and industrial applications with gas pressures of up to and including 25 psi (1.72 bar). Applications include industrial heaters, crop dryers and similar appliances.

Product Overview

Application

The H19 Series BASO high pressure safety pilot valves provide safe lighting and complete shutoff of pilot and main burner gas. They are suitable for use with natural gas, Liquefied Petroleum (LP) gas or LP gas-air mixtures, at pressures up to 25 psi (1.72 bar). The H19 is also suitable for operation over a temperature range of -40 to 150°F (-40 to 66°C).

IMPORTANT: Care should be taken to ensure the valve is installed in applications where operating pressures in excess of 25 psi (1.72 bar) are not expected to develop.

Description

H19 valves are 100% shutoff devices with compact, cast aluminum valve bodies. When lighting the pilot burner, the reset button must be depressed. On models with flow interruption feature, gas flows only to the pilot during lighting operation. Models without flow interruption permit gas to flow to both the pilot and main burner.

Mounting

H19 valves may be mounted in any position. This permits the reset button to be located in the most accessible location. See Figure 3.

Specifications

Product	H19 BASO High Pressure Safety Pilot Valves
Maximum Operating Pressure	25 psi (1.72 bar)
Valve Body	Aluminum
Recommended Thermocouple Lead Lengths	K15: 12 to 48 in. (305 to 1,220 mm) K16: 12 to 72 in. (305 to 1,830 mm) K19: 18 to 72 in. (457 to 1,830 mm)
Ambient Temperature	-40 to 150°F (-40 to 66°C)
Inlet Pipe Sizes	1/4 or 3/8 in. NPT
Outlet Pipe Sizes	1/4 or 3/8 in. NPT
Types of Gas	Natural, Liquefied Petroleum (LP) or LP gas-air mixtures
Packaging	Bulk pack supplied to original equipment manufacturer (individual pack optional)
Bulk Pack Quantity	60
Bulk Pack Weight	30 lb (14 kg)
Agency Listing	CSA Certificate Number 229521-1656106 Australian Gas Association Certificate Number 6734 AGA Class 3, Valve Type Safeguard UL Recognized File Number MH2926
Specification Standards	ANSI Z21.20, CAN1-6.4 ANSI Z21.21, CSA 6.5 AG 204 UL Standard 372

Performance specifications are nominal and conform to acceptable industry standards. All agency certification of BASO products is performed under dry and controlled indoor environmental conditions. Use of BASO products beyond these conditions is not recommended and may void the warranty. Product must be protected if exposed to water (dripping, spraying, rain, etc.) or other harsh environments. The original equipment manufacturer or end user is responsible for the correct application of BASO products. Consult BASO Gas Products LLC for questionable applications. BASO Gas Products LLC shall not be liable for damages or product malfunctions resulting from misapplication or misuse of its products.

Refer to the *H19 Series BASO High Pressure Safety Pilot Valves Installation Instructions* (BASO-INS-H19HP) for necessary information on the installation, use, and servicing of this product.
